

Dates Vary

1 class per month; 3 days during the week. 9am – 5pm

Classes may be postponed and rescheduled pending local and state regulations/guidelines pertaining to Covid-19 restrictions

Please wear masks upon arrival each morning and have them available during the training session for any close contact during instruction.

Cost

\$1995 with \$1000 due upfront to reserve your spot, and the balance due on the 1st day of class.

What's included

- All film used during training
- Basic installation tools
- Lunch
- Aerotect Training Certificate of Completion
- \$250 AeroTect Merchandise credit to be used on future PPF purchase
- 2 Partial front end PPF kits to continue your learning after the class
- Ability to join us for 1 day at a future training, to refresh your skills (advance notice required)

Class Basics

- All experience levels welcome!
- Class focuses on precut kit installation, however, an overview of cutting software, plotter function, and bulk/custom installation is also a part of the training curriculum.
- Classes are held at our NEW & EXPANDED training facility in La Verne, CA.
- Class sizes are kept small to ensure they remain hands on for all participants. They do, however, fill up fast so don't delay if it's something you really want to do.
